URGENT NOTICE

Stage 2

Thanks to your efforts we are still in stage 2 of the curtailment plan. We have not made any headway this week as we were hoping to. **We would like to thank you all who made this possible.** While we are still in stage 2, with the lowering temperatures we are hoping to continue to gain in the amount of water we currently have in the tanks.

We are currently in the process of testing new well sites. **We need your help!** We are still asking for all customers to reduce their water demand by cutting back resources and conserving as much as possible. Here are some things to check: **A running toilet, damp spots on walls or ceiling, water stains, visible puddles, the sound of running water when no faucets are on, musty smells or signs of mold growth. You can also check your water meter while all sources are off to see if there is a change in the reading, water leaks in irrigation systems, dripping faucets inside or out.** Until a secondary supply can be established the following guidelines have been implemented:

- Be conscious of unnecessary water running.
- Ensure there are no water/irrigation leaks on your property.
- Washing vehicles, misting systems, filling pools, spas, fountains is highly discouraged.

Together we can get through this crisis. Know that we are working diligently on our efforts. We ask of you the same.

Once again we would like to thank you for your continued efforts to conserve and get all of us through this difficult time.
